5. RESULTS
6. DISCUSSION

We thank Dominic Bowman, Meridith Joyce, ETC ETC ETC. EHA is funded as a CIERA Postdoctoral fellow and would like to thank CIERA and Northwestern University. We acknowledge the hospitality of Nordita during the program "The Shifting Paradigm of Stellar Convection: From Mixing Length Concepts to Realistic Turbulence Modelling," where the groundwork for this paper was set. This work was supported by NASA HTMS grant 80NSSC20K1280 and NASA SSW grant 80NSSC19K0026. Computations were conducted with support from the NASA High End Computing (HEC) Program through the NASA Advanced Supercomputing (NAS) Division at Ames Research Center on Pleiades with allocation GID s2276. The Flatiron Institute is supported by the Simons Foundation.
